Mechanism	Ease of construction	Reuse and extensibility	Evolution and maintainability	Integration and interoperability	Expressibility and flexibility	Scalability
Stereotyping and profiles	Very easy. Existing tools can be used.	Good since profiles work like components.	Can be maintainable if well architected.	Very high. Good interoperability.	Very restricted.	Limited for stereotypes. Good for profiles.
Meta-metamodel instantiation	Hard in isolation. Should be used with other mechanisms.	No direct support.	No direct support.	No direct support.	Highly expressive and flexible.	No direct support.
